## Trigger switch + Sliding lock-on switch

DCL280F only  
allows for long continuous cleaning with less fatigue.

By moving ① sliding lock-on switch to ON position, ② interlocking trigger switch can be locked on for continuous cleaning.

## LED job light

illuminates the work area.  
also function as a battery capacity warning lamp

**BL**  
MOTOR

**New internal construction prevents loose installation of filter/paper dust bag to protect the motor room from dust.**

## Pipe lock

Pipe is fixed with the locking mechanism to prevent it from accidentally coming off.

## Pipe with beveled end

Cleaning of tight places can be done without nozzle by using the beveled end of pipe as a nozzle.

## Paper dust bag ( DCL282F )

Moving stopper prevents front cover from closing if paper dust bag is not installed tight.

## HEPA filter is available ( DCL280F / DCL281F )

**HEPA**  
filter

## Capsule type ( DCL280F / DCL281F )

When capsule is installed securely, two ribs inside capsule press the inside frame of filter to hold the filter tight.

## Quiet cleaning & Low vibration

- ① achieved by noise absorbing sponge attached inside housing.
- ② Using softer elastomer for the part that fixes fan cover, the vibration of housing is reduced, increasing comfort even in long continuous cleaning.
