Push&Clean

semi-automatic filter cleaning system
for extended operating time and filter life.

1 Block inlet or hose to create maximum under pressure inside container.

2 Clean filter with a reversed air pulse by pushing the Push & Clean button on top of motor head 3-4 times.

A powerful reversed air pulse will clean the filter gently, and you are back to work in no time.

Modern motor head design

- Compact and ergonomic for easy transportation and storage
- Simple and easy to use for cleaning and dust extraction
- Embossed interface for protection of main switch
- Integrated parking positions for nozzles and tubes
- 20L plastic container with big wheels
- Everything on board
